Figure 5

- Figure 3** View from within the site toward Airport Drive  
**Figure 4** View from within the site north toward Rolleston Street  
**Figure 5** View from within the site toward Davie Street entry

**Figure 6**      *The application site in its wider setting. Its extent is evident in the photograph.*

Source: Google Street View

**Figure 7**      *The site as viewed from the Davie Street entrance prior to it being cleared*

**Figure 8 Sign Elevation** *The proposed sign to be located at the Davie Street entrance.*

**Figure 9** *Photomontage showing the effect of the proposed sign as viewed from the intersection of Park and Davie Streets. The sign will be back dropped by vegetation which will have the effect of reducing its apparent extent.*

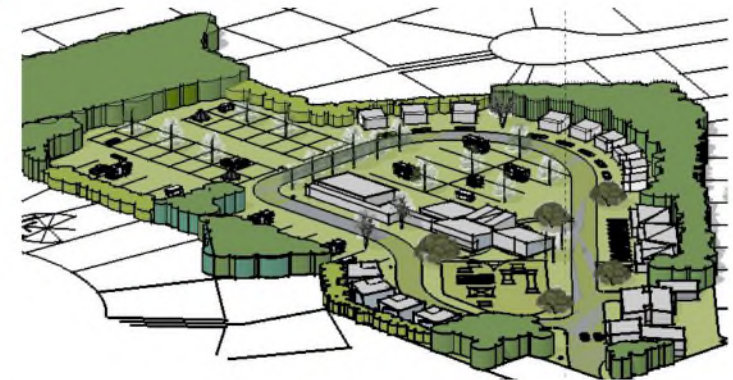

1 - Perspective of Campground from Airport Drive looking west (approx elevation 250 m), showing the two types of mass planting around boundaries (lower shrub and taller tree planting), and within the campground specimen and screening planting.

2 - Perspective of Campground from near Airport Drive looking west as might be seen from an adjoining property at an elevation of 6 metres, showing the effectiveness of the screen planting.

3 - Perspective of the Campground from the entrance looking north-east (approx elevation 250 m); showing mass planting along the boundaries, and specimen and screening planting inside the campground. Note how the planting inside the campground will reduce the site's scale and inter-visibility for both campers and any neighbours able to see in through the boundary planting.

# Hokitika Camping Ground, Davie Street

## PLANTING PLAN - DRAFT
